

Reducing Grout Efflorescence

Kemgrout

Packaging Mixing

Application

Natural Sealer

Packaging Mixing

Application

Sealcote

Packaging Mixing

Application

Substrates

Wall and floor tiles
Granite / Marble tiles

Materials

Kemgrout (cement-based grout), **Primebond** (acrylic bonding additive), **Natural Sealer** (solvent-based water repellent) and **Sealcote** (water-based sealer).

Surface Preparation

All surfaces must be clean and sound and free of grease, dust, coatings and other contaminants. New concrete must have cured for 28 days or more.

Workmanship

Apply products in accordance with the manufacturer's written instructions and good trade practice.

Application

Grouting

Mix **Primebond** and water with **Kemgrout** to a thick creamy consistency force the grout firmly into the joints.

Sealing

Seal porous tiles/grout with two coats of **Natural Sealer** or **Sealcote** to reduce water absorption.

Precaution

Do not apply sealers over glazed tiles or non-porous tiles.
