									TECHNICAL INSTRUCTION SHEET
●			○				○		Surface sealer - tile / stone / substrate (wet look - gloss)
	●			●	●	●			Penetrating sealer - tile / stone / substrate (no appearance change)

- Interior and exterior
- Interior only

The appearance, wear properties and maintenance of sealers varies on every surface. A test area must be applied to the surface to check its suitability, bond and appearance. The surface to be sealed must have some porosity and be capable of accepting the sealer.

User must always refer to constructionchemicals.com.au for the latest technical data sheet for the product concerned.
